

**EORTC promotes cancer research in Europe and is linked to other leading biomedical research organizations around the world. EORTC research takes place in over 200 hospitals, universities and cancer centers in 32 countries and the unique network of investigators of EORTC comprises more than 2000 clinicians collaborating**

**The EORTC research facility based in Brussels has a vacancy for a:**

## **Medical Research Fellow**

The research fellow will be involved in research as well as research projects within EORTC Breast Group trials mainly the MINDACT trial, focusing mainly on identifying molecular pathways of resistance in breast cancer treatment, comprising of broad based research questions, analysis, presentation and dissemination of results. This work will possibly result in major publications and presentations at key oncology scientific conferences.

The fellowship offers an excellent opportunity for wide training in cancer clinical trial methodology in a multidisciplinary environment including clinical trial design, statistics, operations, implementation and conduct.

The fellowship has the duration of one year, renewable to a maximum of 3 years at the EORTC Headquarters in Brussels, Belgium.

Candidates must:

- be a young oncologist
- have a focus or interest in breast cancer clinical research
- preferably have clinical research background (a translational research experience will be considered an asset)
- be fluent in English
- be computer literate
- be able to work in an international environment
- have excellent communication skills and team spirit

Candidates must send:

- a letter of motivation
- a full curriculum vitae
- areas of interest in breast cancer research
- letter of recommendation from 2 referees
